

**Endeavor PowerPoint Bullets for 6/22/2010**  
**Operational Period: 6/21/2010 Sampling Period**

- The Endeavor completed 1 CTD casts at 1 station (EN08) on 6/21/2010. Water samples were collected for analysis of TPH and VOA.
- The Endeavor reported evidence of plumes at 340 m and 1100 m based on Aquatracker aromatic hydrocarbon fluorometer and TETHYS mass spectrometer readings. However, this is not evident on the CTD plot that the Endeavor provided with their daily status report. Decreases in dissolved oxygen were present between depths of 800m and 1200 m.
